

Telemedicine Visit New Patient Prescribing Guidelines for NMG and RMG Providers

1. For new patients who don't have an immediate medication need and are just looking for an annual exam/new PCP, postpone the appointment until the Stay at Home order is lifted.
2. For new patients who need a refill on a medication they have already been taking, conduct the video or phone visit, and as long as the physician feels comfortable, refill for a short period of time and condition the next refill on an in-person visit.
3. For new patients who are requesting a new medication, conduct a video or phone visit, and defer to the physician's judgment on whether to prescribe a new medication.
