

# COVID-19 Positive Result 20 Day Review BPA

Impacted Locations	ALL
Intended Audience	Inpatient Physician and APPs

### **Review the Updates**

- For admitted patients whose COVID-19 infection flag expires while admitted, physicians will be prompted with a 20-day result review alert. Once the physician addresses the alert, the Positive Infection flag will update.
- For any Immunocompromised patients (including readmissions) whose COVID-19 infection flag expires, physicians will be prompted with a 20-day result review alert. Once the physician addresses the alert, the Positive Infection flag will update.

#### Rationale

- Implement a clinical review of the patient's COVID-19 infection and isolation status.
- Allow the ability to either reapply COVID-19 precautions or clinically clear the patient.
- Ensure tests are ordered appropriately for clinically clearing high risk patient populations.

## Choose next steps based on criteria

When receiving the Best Practice Advisory, select one of the following:

	BestPractice Advisory - Test, Douglas
COVID-19 (1)	*
20 Day COVID-19 Positive Result Review	y .
This patient's COVID-19 te	est was resulted as positive and is up for 20 day review.
