COVID Infection Status Flags

COVID Infection Status Flag	How is flag added to patient's chart?	How is flag removed?
Rule Out COVID-19	Applied automatically when COVID-19 lab test is ordered for all patients, except outpatients being screened prior to procedures.	Automatically removed upon final result of COVID-19 lab test, for both positive and negative results
COVID-19	• Applied automatically with positive COVID-19 test result (both internal and external results via Care Everywhere) • Manually added by Infection Prevention, if documented within Travel Screening • Ordered in ED via patient disclosure of positive diagnosis	• Automatically removed 40 days after resulting or 40 days after the most recent discharge, whichever is later • Clinical Clearance: Time based strategy or Re-Testing strategy
COVID-19 (Presumed Positive)	• Ordered through Inpatient Negative BPA workflow. • If patient refuses COVID testing, applied after physician orders "Refused COVID-19" order	• Automatically removed 40 days after ordering • Clinical Clearance: Time based strategy or Re-Testing strategy • Flag can by resolved by physician
