

# COVID Testing Resources for Employees Who Are Not Vaccinated

Employees and approved POIs who are not vaccinated can pick up rapid test kits at the locations below.

Regardless of vaccination status, employees and dependents who are covered under NM health insurance programs can pick up a maximum of eight tests per person, per month, free of charge at local pharmacies and retail providers. Those free tests can also be used for the NM-required weekly testing for members of the workforce who are unvaccinated. Please see details under the COVID-19 staff FAQ's.
