

ICC – Provider Placing COVID Orders for Onsite Testing

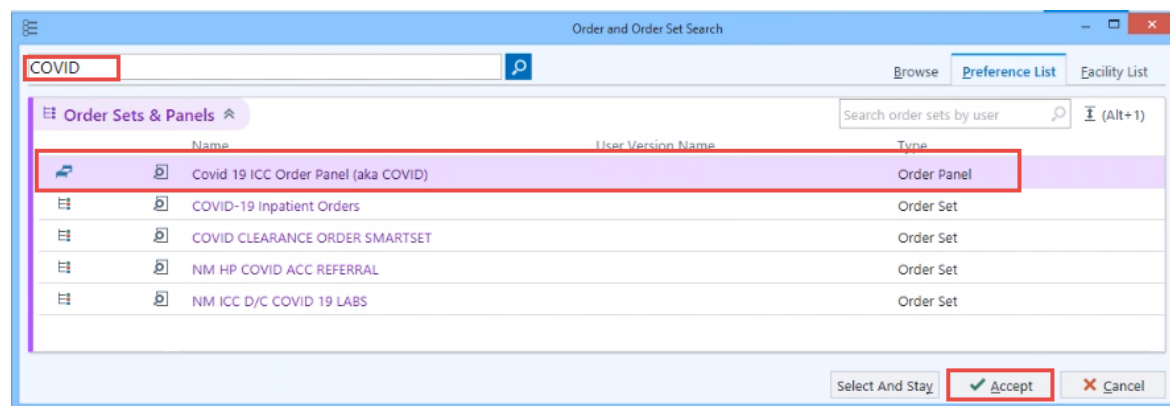

Expected Go Live Date	5/21/2020
Impacted Locations	All ICC Locations
Intended Audience	Ordering Providers

ICC Providers can place orders for COVID testing for patients who have come to the facility to have specimens collected onsite and who have not already had orders for testing placed.

Placing the COVID-19 Testing Order Panel

When a patient has presented in the ICC, orders can be placed to have their specimen collected onsite.

1. From within the patient chart, navigate to the **Orders** workspace.
2. Type *covid* in the search bar and press the Enter key.

3. Select the **Covid 19 ICC Order Panel (aka COVID)** and click **Accept**.

When the order panel opens, select the appropriate order. The **Testing Guidelines Dashboard** link can be clicked to display information for decision support.

- Using the **Testing Guidelines Dashboard** link, select the appropriate order. The Outpatient Community order is shown above as an example. Users can place whichever order is necessary for the patient.

Since the order is being placed for onsite testing, system logic will populate the appropriate location as a pre-checked order.
