

Accessing Applications and Resources on the New NMI

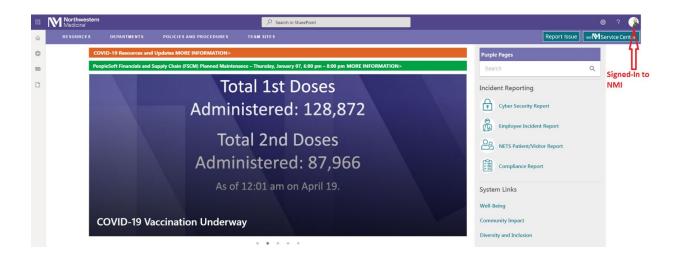

NM Interactive has been updated to reflect a revamped end-user experience and a modern architecture. The move to Microsoft SharePoint Online will provide employees and physicians with a more secure, highly functional, intranet page that can be accessed on any device. This transition also gives NM the opportunity to optimize the delivery of the applications and resources that employees and physicians use.

Applications and Resources	2
••	
Appendix – Applications	4
Appendix – Resources	7

Accessing NMI

When logging into an NM computer or workstation, users also will be signed in to NMI. Simply open an internet browser and the new NMI home page will open. **Avoid using Internet Explorer**, as the site works best in modern browsers, such as Microsoft Edge, Google Chrome or Safari. Palos Health users should use the NMI desktop icon to launch NMI in Microsoft Edge and, when prompted, log in using their Palos credentials. Users will see their picture or initials in the top right corner to show that they are logged in.

NMI is also available from any device with internet access. Navigate to nmi.nm.org and enter your NM or Palos credentials. When off the NM network, users also will be required to use two-factor authentication through the Microsoft Authenticator app.

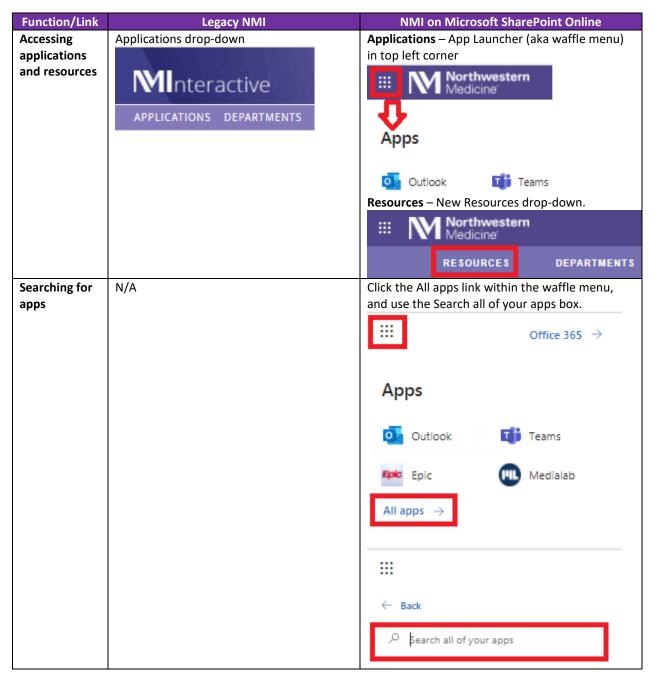

Updated May 10, 2021 1 | P a g e

Applications and Resources

Previously, all applications and resources are housed under the Applications drop-down. On Microsoft SharePoint Online, items classified as applications are accessed via the App Launcher (aka waffle menu), and resources are accessed via the renamed Resources drop-down. The sections within the Resources drop-down are similar to the current state, but have been updated to remove regionalism and add two role-specific menus: Physicians and Nursing & Magnet. Note: To find where a specific item has moved, press CTRL+F and search for that item within an appendix of this document.
