Release Results to Patients in Chart Review

Expected Go Live Date	9/12/2021
Impacted Locations	All
Intended Audience	Clinicians

Release results for a patient to view in MyChart right from Chart Review instead of going to the separate MyChart Results Release activity.

Release a Result from Chart Review

1. Select Chart Review for a patient whose results you need to release.
2. Select the tab that includes the relevant result, such as Labs.
3. Select the result needing to be release.
4. Select the Patient Sharing option.
5. Type a comment for the result that the patient can see in MyChart, In the Release to Patient window.
6. Select the Notify if not viewed check box if you'd like to receive an In Basket message if the patient hasn't viewed the result within the specified amount of days.
7. Select the Accept button when finished.
